

## Indications of New Railroads

The first evidence of coming revival of railway construction on a considerable scale in the northwest was afforded in Portland last Thursday by the organization of the Oregon, California & Eastern railway, designed to supply some 400 miles of standard gauge lines for central Oregon and adjacent territory, at an estimated expenditure of \$7,000,000.

Some forty leading bankers, merchants and others, including J. C. Ainsworth, A. L. Mills, William M. Ladd, Emory Olmstead, Julius Meier, Theodore B. Wilcox, H. C. Wortman, Adolphe Wolfe, H. L. Pitcock, William F. Woodward and Nathan Strauss met to inaugurate the enterprises and engaged Robert E. Strahorn, builder and former president of various Harriman lines in the northwest, to head the company by assurances of support.

The project, its promoters announced, promises a new and direct all-rail line directly south through central Oregon to Nevada, California and the east, saving several hundred miles over present routes to Reno, Carson City and other Nevada and northeastern California points. It was said it also would open new and rich trade territory in central Oregon and northern California and Nevada.

The plan is for an east and west line of 150 miles to connect the Harriman and Hill lines at Bend, with the Oregon Short Line in Harney valley, a north and south line of 170 miles to connect Bend with the Nevada-California-Oregon line at Lakeview, a sixty-mile branch from the latter in Silver Lake valley southwesterly to Kirk, the terminus of the Klamath line of the Southern Pacific, giving Portland and Spokane a direct line to Klamath Falls, and a thirty-mile branch from the Lakeview line easterly to Warner valley.

From reconnaissances and surveys already far advanced, it is believed the system can be completed and equipped in about three years.

## Jackson County Shows Big Gain

Jackson county ranks fourth in the list of Oregon counties for the number of automobiles registered from January 1 to September 30 of this year. One thousand, one hundred and ten automobiles were registered in the county, and we know where there are two or three which got by without registering. Ninety-eight motorcycles were also registered in the county. The county is exceeded by Marion, Umatilla and Multnomah counties in the number of cars. Marion and Multnomah only have more motorcycle fiends.

The total number of cars registered in the state, according to figures prepared by Secretary of State Olcott, is 22,998, the total of motorcycle registrations 3,123, chauffeurs 3,804 and dealers 171.

The increase in the motor vehicle registration over the corresponding period last year is 6,877, the increase in motorcycles 246, the increase in chauffeurs' registration 2,095, and increase in registration of dealers 62.

## Wins Fifth Prize In Car Loading

To obtain a marked improvement in car loading, the Southern Pacific Company has held a number of general competitions covering the Pacific System. Under the terms of these contests, money prizes have been offered for excellence in loading certain commodities. For the best loading of each there have been offered two prizes, one of \$50 and the other of \$25.

The Southern Pacific Bulletin publishes the list of the prize winners for the first six months of 1915. The Ashland station, G. N. Kramer agent, took fifth place in the loading of small merchandise. Loading the car to its maximum capacity means getting the full measure of service from the car and is an important economical measure.

Leonidas made history when he held the Pass of Thermopylae. For two bits you can see history repeat itself next Saturday when Climax Delaman and his men hold Grants Pass.

## Making Progress With Springs Work

Mr. Emory Smith of Smith, Emory & Co., who is here overseeing the installation of the pipes from the various springs, reports as follows on progress being made:

"Our sulphur line is working satisfactorily. The gas line is done except a few hundred feet. The lithia and soda lines were started at the park end. The former is laid beyond the railroad and the latter almost to the railroad. Delay on these was caused by a change of ditch level caused when the city established street grades. Two pipe-laying gangs are at work and material is coming as fast as needed.

"The completed distributing system in the park will be tested out with city water in a few days. The central station is rising. Tiles for the roof are on the ground and the tile setter is here from San Francisco. Tile is being placed on the lithia spring building and is on the ground at the soda spring. The steel bridge at the lithia spring is completed. The concrete building at the Cunningham gas spring is ready to strip and bridge and retaining wall will be put in at once.

"All machinery equipment is completed and, with the exception of the compressor and pumping plant for the gas spring, is either on the ground or in transit. The latter machinery is being assembled in San Francisco and should be ready to ship within a week."

## Utah Sugar Man Here Last of Week

Alex Nibley, secretary of the Utah-Oregon Sugar Company, will be in the valley the last of the week in connection with a \$600,000 sugar beet factory which will be built in the Rogue River valley in the near future, providing contracts for 5,000 acres can be signed up by the farmers of the valley. This statement was sent by George E. Sanders, vice-president and one of the directors of the recently organized Oregon-Utah Sugar Company.

The commercial clubs of the valley have been asked to co-operate in the campaign to secure acreage, and to help put the sugar beet factory in the valley.

## White Ribbon Here Monday

The White Ribbon special, bearing 250 of the biggest and best known workers for the cause of temperance in the United States, will arrive in Ashland next Monday. The exact hour has not yet been ascertained. The W. C. T. U. people will spend Sunday in Roseburg. Everybody in Ashland is urged to greet the national workers at the station and bring flowers and fruit. If arrangements can be made the train will remain here for an hour and short speeches by women of national importance will be heard. A big delegation will be up from Medford.

## Dr. Reader Dies At Santa Rosa

Dr. James K. Reader of this city died at Santa Rosa, Cal., Monday night, where he had gone about a month ago for his health. He was 69 years old and a native of Illinois. He came to Ashland about twenty years ago and had been in practice as a homeopathist. He was a Civil War veteran and had served as medical examiner on the pension board of this district.

His wife survives him. Funeral and interment will take place at Santa Rosa.

A party of hunters consisting of Councillman R. P. Cornelius, Prof. Vining, Ralph Vining and O. Winter returned Monday evening from a sojourn in the Elk creek country. Prof. Vining carried off the laurels and secured two fine bucks, one of which, a five-pointer, Mr. Cornelius declares to be the biggest he has ever seen. Fred Sturgis of the Elk creek country, who accompanied the party in the capacity of guide, also secured one.

## Talk About Bargains!

The Ashland Tidings one full year and the Sunset Magazine for ten months, all for

### Two Dollars

This offer good for ten days only

If your subscription is not quite due, by paying two dollars the subscription will be extended from date of expiration.

This offer is made for new subscriptions, but will extend to old subscribers on above basis.

Subscription must be paid at the Tidings office to secure this bargain

## Beet Factory For Rogue Valley Depends Upon Acreage Signed

In a full-page announcement in this issue the Oregon-Utah Sugar Company puts the proposition of a \$600,000 beet sugar factory for the Rogue River valley squarely up to the people. This announcement should be carefully read by everyone. The company promises to put in a factory which will employ a big payroll and turn several hundred dollars loose in the valley every year, providing the growers will sign up 5,000 acres for beets.

This is the biggest opportunity that has come to the people of the valley in many years, and united co-operation should carry the acreage campaign through in a few weeks with one wave of enthusiasm. Committee headquarters have been established at the Medford Hotel in Medford and the Josephine Hotel in Grants Pass, and contracts will be ready for distribution within a few days.

The company officials state that they intend locating a factory in Oregon and believe the Rogue River valley to be ideal for beet raising, and therefore will give the valley the chance to secure the factory simply by getting the required acreage signed up.

The contracts call for a five-year term, beginning with 1916, and the company agrees to pay \$5 per ton for all beets over 80 per cent purity or better and containing 15 per cent or more sugar, and for all beets containing 80 per cent purity or better and containing no less than 12 per cent sugar, at the rate of \$4.25 per ton. It is agreed in the contract that payments for all beets shall be on the 15th of each month.

The Oregon-Utah Sugar Company is offered by men of financial power, and the establishment of a beet sugar factory here would mean the induction of Utah capital into this section. The president of the concern is C. W. Nibley, a bishop in the Mormon church, wealthy banker and timberman. Alex. Nibley, his son, is secretary, and Harold Smoot, son of Reed Smoot, United States senator from Utah, and Willard R. Smith, son of the head of the Mormon church, directors. Bishop Nibley's interest in the project is to establish his son Alex. in a big business.
